

ONE VOICE FOR MANUFACTURING: The Importance of Government Advocacy

If you're not at the table in Washington... you're on the menu. **One Voice**, the joint partnership of the **National Tooling and Machining Association (NTMA)** and **Precision Metalforming Association (PMA)**, is the voice of small and medium-sized manufacturers in our nation's capital. One Voice brings a pro-manufacturing message to lawmakers and the public through education, advocacy, and leadership.

EDUCATION

The federal government is your not-so-silent business partner, affecting every aspect of American manufacturing. From the cost of regulatory compliance to the consequence of updated tax measures, **One Voice educates Congress on the impact of legislation on manufacturing.**

ADVOCACY

From social media campaigns to the annual Legislative Conference, **One Voice is always on the front lines supporting US manufacturers.** One Voice has served a pivotal role in the passage of laws related to advancing job training programs, protecting tax credits, delaying pro-union anti-workplace rules, and developing the first US National Manufacturing Strategy.

LEADERSHIP

One Voice makes it easier for NTMA and PMA members to become more engaged in policy by providing tools to join the conversation. One Voice tracks how Senators and Representatives vote on key manufacturing issues, develops toolkits to plan plant tours for government officials, and provides tips for speaking to the media and managing social media.
